

ONLINE LESSON PLANNING USING
PLANBOOK.COM

sclements@sd38.bc.ca

So what is planbook.com

It's an online lesson planning tool that allows you to keep all your lesson plans in one place.

It cost \$12 US a year to use.

It is very easy to use and has many great features.

What makes planbook useful?

Synced to a calendar. You input key dates like Pro D days etc.

Plans automatically fill the calendar taking non instructional days you have identified into account.

Keeps all your plans together in one place and synced

Really easy to modify your plans,
e.g. insert a day, extend a day,
move a day.

Easily transfer your plans from one
year to the next.

Have a master plan for a course you
teach multiple times.

Attach any file you use in the lesson to the plan.

Allow students to access your plans. You can restrict what they can see.

Share your plans with other teachers and/or collaborate on a joint plan.

Very reliable. In a year of use I have not had one issue with access.
